

Symposium on **"Nano-medical Materials I"**

Remarkable progress of biosciences promotes the development of biomedical materials, especially "nano-medical materials" based on the BIOINSPIRED concept. This C-8 symposium would be performed with C-9 and mainly we would like to discuss recent studies on bioinspired materials, biocompatible materials, soft materials for tissue engineering, organic and inorganic hybrids and so on. Many contributed papers and several invited speakers will be presented for the above topics. We welcome the speakers or poster presentations for the following topics.

Topics

- * Bioinspired materials
- * Biocompatible materials
- * Organic-inorganic hybrids
- * Hydrogels
- * Tissue Engineering
- * Others

Chairpersons

Prof. Mitsuru Akashi	Dr. Takahisa Taguchi
Kagoshima University	AIST

Prof. Yasuo Suda	Dr. Hajime Ohgushi
Kagoshima University	AIST

Prof. Takao Aoyagi
Kagoshima University
